I'm a solution oriented Full Stack and Python developer. I love to learn new stuff on my free time, and I enjoy working in web development because of the satisfaction that I get by overcoming challenges and designing pretty websites. I'm motivated by the idea of working on software that may help someone life for the better.

SKILLS AND TECHNOLOGIES

Javascript, Typescript, Python, React, Tailwind CSS, Sass, Express, MERN Stack, MongoDB, SQL, MySQL, Git, JSON Parsing, RESTful APIs, Postman, Object-oriented Programming, Debugging

PERSONAL PROJECTS

Trailer Paradise – Full Stack Developer

Jul. 2022, PRESENT

- Built back-end with proper MVC structure that serves a custom RESTful API of trailer objects from a MongoDB database.
- Designed and created responsive mobile friendly front-end website with React typescript and Tailwind CSS that uses the custom RESTful API from the back-end to present users with a YouTube video of a trailer using the YouTube API.
- Diagnosed and remedied technical debt resolving over 40 React errors, which helped improve build time by 32%.

Data Visualizer – Python Developer

May. 2022, PRESENT

- Designed and developed graphical interface with flexibility and scalability in mind for a "it just works" approach.
- Optimize filter, and search functions to run 56% faster with the use of dictionaries and proper python conventions.
- Developed with OS compatibility in mind that allows it to work on Windows, MacOS, and Linux machines.
- Published on PyPi and ready to be downloaded with Python's package installer PIP.

YouTer – Python Developer

Sep. 2021, PRESENT

- Designed and developed user-friendly terminal GUI wrapper for youtube-dl that allows users to download YouTube videos easier.
 - OS-friendly and compatible with Linux, MacOS, and Windows machines.
 - Published on PyPi and ready to be downloaded with python's package installer PIP.
